Solutions through Play:

“Somerset Healthy Schools Programme is pleased to endorse the work done by Barnardo's. Schools have incorporated play-based activities in their planning to improve the whole school experience.”

Managing Challenging Behaviour

Staff training in working with young people with challenging behaviour including those with Autism and or AD(h)D. The training is followed up by a series of young people focused play sessions.

Anti Social Behaviour Reduction

We offer an early intervention approach to reducing anti social behaviour cases within Communities.

Play to Learn

An opportunity for young people to achieve their educational outcomes without even realising it. All sessions are planned around the national curriculum and tailored for each subject. This session is ideal for young people with additional needs or as a reward.

Play Sessions, Play Rangers and Mobile Play Facility

Ideal for schools, communities and after-school provision, this facility offers the services of two skilled play workers alongside a mobile facility which comes packed with an Aladdin's cave of outdoor play resources.

Community Events / Play Days

Our events are hugely popular with children and parents. They are guaranteed to be a lot of fun and are often used to try out new ideas within an existing play space, or consult with children about their ideas.

Children Design New Play Space

Children should be involved in the design of their own play spaces. Our approach increases the inclusion levels for children of all ages in their play space and the satisfaction of organisations investing in play spaces.

Dads and Lads

Whether in a school environment or as part of a community based project, we can offer fun and challenging play opportunities to help dads engage with their children.

Play in the Natural Environment

This service is perfect for organisations working with children who have little access to the natural environment, or for children with health or behavioural issues.

Play Development

Sessions to support professionals to promote more opportunities for children to undertake independent, adventurous play.

Develop a Culture of Outdoor Play in your School or Community

Perfect for schools and communities, this three month programme will leave a lasting legacy of healthy outdoor play for children. Ideal for anyone wishing to undertake a fundamental review of their play culture.
